Bounce Diagram: Typical Client/Server or Web Application

The diagram illustrates the sequence of frames and acknowledgments in a typical client-server interaction. The Client and Server lifelines are shown at the top. The sequence of events is as follows:

- Frame 1:** Sent from Client to Server.
- Frame 2 (TCP Ack):** Sent from Server to Client.
- Frame 3:** Sent from Client to Server.
- Frame 4 (TCP Ack):** Sent from Server to Client.
- Frame 5:** Sent from Client to Server.
- Frame 6 (TCP Ack):** Sent from Server to Client.
- Frame 7:** Sent from Client to Server.
- Frame 9 (TCP Ack):** Sent from Server to Client.
- Frame 8:** Sent from Client to Server.
- Frame 10 (TCP Ack):** Sent from Server to Client.

Vertical double-headed arrows indicate the duration of the flows:

- Flow 1 Data Duration:** The duration on the Client side from the start of Frame 1 to the end of Frame 10.
- Flow 1 Duration:** The duration on the Server side from the start of Frame 1 to the end of Frame 10.
